

# APbattery

## 51.2V/6.5kWh

Compared with normal batteries, the APbattery is characterized with a better charging and discharging performance, longer life cycle and less self-discharging loss. The built-in BMS monitors the battery operation status and alarm to avoid operation out of limits. A maximum of 8 batteries can be connected in parallel to extend the energy and power of the energy storage system. The APbattery establishes the communication with the PCS via the CAN network port itself.

### PRODUCT FEATURES

The battery is a 6.5kWh LiFePO4 pack. Battery coordinates with PV, power conversion system (PCS), Grid, DC Breaker and loads in the residential energy storage system.
